

I wish to register my opposition on changing the State of Wisconsin's no call list to a less restrictive list. I believe the state has the right to set up its own laws on no-calling that meet their constituents wants. It is not to make life easier for banking groups who wish to reach their customers. As a customer of a bank, I do not wish to be reach with sale pitches on investments and other services that they wish to sell. I just want a safe place to keep my money. If these banks want to reach their consumers they should ask for written permission.
